👤 Profile

Fullstack Developer with hands-on experience in building web-based applications and enterprise systems across frontend and backend. Proficient in developing RESTful APIs, designing relational databases, and integrating systems using technologies such as Java, Node.js, Angular, and .NET. Experienced in implementing end-to-end features including authentication, data processing, and system integration, as well as optimizing application performance and ensuring code quality through debugging, testing (UAT), and collaboration with QA teams. Also involved in developing scalable features such as QR code generation, dynamic links, and reporting systems, with a strong focus on maintainability and system reliability.

📁 Professional Experience

Summit Global Teknologi,

09/2023 - 12/2023

Frontend Engineer 📁

Tech Stack: Vue.js, JavaScript, HTML, CSS

- Developed and implemented responsive landing pages for the Infinix Series 40 product, ensuring optimal performance, responsiveness, and cross-device compatibility
- Implemented multi-language localization to support regional users and improve accessibility across different markets
- Supported the development of an AI-based chatbot system by coordinating technical requirements and aligning implementation across cross-functional teams
- Collaborated closely with UI/UX teams to ensure accurate design implementation and maintain visual consistency across digital assets

Metropolitan Retailmarta,

04/2022 - 03/2023

Web Developer 📁

Tech Stack: PHP (CodeIgniter 3), JavaScript, MySQL, Apache Solr

- Developed email notification features and collaborated with end users to ensure system implementation aligned with business and technical requirements
- Contributed to the development of game event features by working closely with UI/UX teams on interface design and supporting user validation prior to deployment

- Maintained and enhanced web-based applications to ensure system stability, availability, and reliability
- Identified, analyzed, and resolved application bugs to improve overall system performance and software quality
- Performed data validation and optimized search functionality using Apache Solr to ensure data accuracy and relevance

PT Hasjrat Multifinance,

11/2019 - 10/2020

Web Developer ☑

Tech Stack: Java (Spring Boot), JavaScript, jQuery, Bootstrap, SQL Server, JasperReports (iReport)

- Performed maintenance and optimization of web-based applications to ensure system performance, stability, and reliability
- Designed and customized reporting templates using JasperReports (iReport), including layout design, data mapping, and report integration based on business requirements
- Identified, analyzed, and resolved application issues to improve system stability, functionality, and overall software quality

Bpjs Kesehatan ☑

Fullstack Dev

09/2024 - 06/2025

Tech Stack: Java (JAX-RS / Jersey), AngularJS, JavaScript, SQL Server, REST API

- Developed and maintained web-based applications with full CRUD functionality for data management systems using Java backend and AngularJS frontend
- Designed and implemented relational database structures, including tables and stored procedures, to support application requirements
- Built and exposed RESTful APIs using JAX-RS (Jersey) to enable seamless communication between frontend and backend systems
- Developed features such as dynamic link generation and QR code functionality to improve information accessibility and distribution
- Integrated AngularJS frontend with Java backend to ensure consistent data flow and application behavior
- Performed testing, debugging, and issue resolution to enhance system stability, performance, and reliability
- Collaborated with users and QA teams to gather feedback, refine features, and support User Acceptance Testing (UAT)
- Participated in basic security testing to ensure application compliance with quality and security standards

.Net Dev

06/2025 - 09/2025

Tech Stack: .NET (C#), LINQ, SQL Server, Microservices

- Contributed to the development of a microservices-based system using .NET, focusing on improving data access layer structure and overall maintainability
- Refactored legacy database interactions by migrating stored procedure-based queries to LINQ, enhancing code readability, maintainability, and reducing dependency on database-level logic

- Optimized data access layer to improve performance in data retrieval and processing, resulting in more efficient and structured data handling within the service layer

Mobile Dev

09/2025 - 04/2026

Tech Stack: Flutter (Dart), REST API, Provider (State Management)

- Developed a mobile application from scratch using Flutter, focusing on frontend development and UI/UX implementation based on system requirements
- Integrated REST APIs for authentication, data submission, and real-time status tracking between mobile application and backend services
- Built core features including authentication system (Login, Register, OTP, Forgot Password, Profile management)
- Developed key modules such as public information submission, real-time status tracking, objection/appeal system, and informational pages
- Implemented responsive dashboard for both guest and authenticated users
- Applied state management using Provider to support scalable and maintainable application architecture
- Performed debugging, bug fixing, and UI refinement to ensure application stability and consistent user experience
- Collaborated with backend and QA teams during testing, validation, and release cycle, including participation in security and QA feedback processes

Frontend Dev

04/2026 - Present

Tech Stack: Angular, TypeScript, HTML, CSS

- Redesigned key user interfaces of the AMAN JKN application (login, dashboard, validation, rehabilitation module, location search, and data update), improving usability, consistency, and user navigation experience

Education

S1, *STMIK Nusa Mandiri*
Sisten Informasi

2018 - 2019 | Bekasi

D3, *Universitas Bina Sarana Informatika*
Manajemen Informasi

2015 - 2018 | Bekasi

Skills

Frontend:

- Angular (TypeScript), Vue.js, Next.js, AngularJS
- Core: JavaScript, HTML, CSS
- Styling: Bootstrap
- Mobile: Flutter (Dart)

Tools & Technologies:Development:

Visual Studio Code, Visual Studio

Version Control:

Git, GitHub, Bitbucket

Environment:

XAMPP, WAMP

Soft Skills:

- Problem Solving, Effective Communication, Team Collaboration, Adaptability, Analytical Thinking

Backend:

- Java, .NET (C#), PHP, Node.js
- **Database:** MySQL, SQL Server, PostgreSQL
- **Backend Services / Platform:** Supabase

API Testing:

Postman, Insomnia

Reporting:

JasperReports (iReport)

Projects

Landing Page Hospital

Frontend: React.js (JavaScript), Reactstrap

Styling: CSS, Font Awesome

TableList

Frontend: HTML, CSS, JavaScript

API Integration: REST API (Public APIs), Axios

Movie

Frontend: React.js, CSS

API Integration: REST API (Public APIs), Axios

Landing Page Bioskop

Frontend: React.js (JavaScript), React-Bootstrap, CSS

API Integration: REST API (Public APIs), Axios

Undangan Nikah 1

Frontend: JavaScript, HTML, CSS

Toko Shop

Frontend: Vue.js (JavaScript), HTML, CSS

Warung Soto Ayam

Frontend: HTML, CSS, JavaScript

UI Libraries: Bootstrap, Swiper

Layanan Hiburan Digital

Frontend: React.js (JavaScript), Vite, Redux

Styling: CSS, Tailwind CSS

Undangan Digital 2

Frontend: HTML, CSS, JavaScript

PPID

Frontend: Angular (TypeScript), HTML, CSS
